SUMMARY

Final-year B.Tech Computer Science student (VIT Bhopal, 2027) seeking a Product Management Internship through campus placement. Founder of MoodNest (moodnest.in), a live event-ticketing platform scaled to **5+ Indian cities, 20+ clients, and 1000+ attendees**, where I've owned product decisions end-to-end – from user research to pricing model to production rollout. **NPTEL Marketing Analytics Course Topper** (IIT Kharagpur, top 5% of 3,495) with the technical depth to prototype and validate ideas independently before handing off to engineering.

WORK EXPERIENCE

Founder & Product Lead — moodnest.in — [GitHub](#)

Jan 2026 – Present

Live Event Ticketing Platform

MERN Stack

- Built and scaled MoodNest from zero to **5+ Indian cities, 20+ clients, and 1000+ attendees onboarded**, owning the product end-to-end.
- Identified checkout drop-off from mandatory login; redesigned the flow into a **sub-30-second guest checkout** (name + mobile + optional email), removing the single biggest friction point in the funnel.
- Defined **0% commission ticketing** as the platform's core positioning, targeting college fests and grassroots organizers underserved by existing players.
- Shipped an offline-first PWA QR verification system (IndexedDB, service workers) after identifying unreliable venue networks as a recurring cause of entry failures – now handles check-ins with zero connectivity dependency.
- Own the live sales dashboard and multi-event monitoring; platform is MSME-registered.

Software Intern

Mar 2026 – Apr 2026

Webpoint Solutions

Bhopal, India

- Built production REST APIs (Node.js, Express, MongoDB) powering the company's ERP/LMS platforms used by schools, colleges, and universities.
- Implemented JWT-based authentication and role-based access control (student, faculty, admin) to secure multi-tenant education portals.
- Collaborated with senior engineers to prioritize, test, and ship production-ready backend features against a fixed internship timeline.

EDUCATION

Vellore Institute of Technology, Bhopal

B.Tech in Computer Science and Engineering

Aug 2023 – May 2027

CGPA: 7.2/10

PROJECTS

Obsidian Intelligence System — [GitHub](#)

Jul 2026

Prototype built for Predixion AI internship selection process

Python, Obsidian, APIs

- Scoped and built a client-intelligence system consolidating data from Fireflies.ai, HubSpot CRM, and Outlook into a single knowledge graph, as part of a technical hiring evaluation.
- Independently drove scoping decisions and coordinated with an external development team to ship live Fireflies and HubSpot integrations.
- Made a transparent trade-off call to mock the Outlook integration after hitting Azure AD access constraints, rather than overstate what was working – delivered a prototype, GitHub repo, and technical write-up under a fixed deadline.

SKILLS

Product: Product Strategy, User Research, Roadmap Planning, Stakeholder Management, Go-to-Market, Data-Driven Decision Making

Execution: Cross-functional Coordination, API Product Thinking, Agile Workflows, Requirement Scoping

Technical: MERN Stack, REST APIs, PWA, Analytics

CERTIFICATIONS

NPTEL Marketing Analytics Course Topper – IIT Kharagpur, 98%, top 5% of 3,495 candidates (2026)

Google IT Support Professional Certificate (2026) — AWS Technical Essentials (2025)

LEADERSHIP & EXTRACURRICULAR

AdVITYa 2025 – Techno-Cultural Fest

Feb 2025

Core Team Member

VIT Bhopal

- Served as Core Team Member for AdVITYa 2025, VIT Bhopal's annual multi-day techno-cultural fest, contributing to planning and on-ground execution across the event.
